

# CBTW Services

## Web Based Testing

### About this Service

The CBT Workshop (CBTW) now offers Web Based Testing. This capability offers our customers the ability to test an unlimited number of students over the web at a fraction of the cost associated with conventional testing. For our existing courses we have in-place tests covering all aspects of each course. These web based tests will allow you to document each students test results for your records. For your existing tests, we can host your questions on our site. Web based testing can speed up the testing process and increase the productivity of all your testing administrators. Instead of taking students away from their workstations, reserving testing rooms and providing proctors, your testing organization can spend their time developing advanced tests and reviewing in detail the metrics of the test data.

### Capabilities

- Test content may be customized with your questions and answers
- No limit as to number of total questions
- True/False and multiple choice answers with up to five choices
- Students receive feedback and guidance on questions they answered incorrectly
- Printed certificates at the completion of the test with the score
- Your administrator sets the pass / fail criteria
- Actual test questions are randomly selected and delivered from the total question base
- Your custom test can be in service within 5 working days

### Web Based Testing Advantages

- Determine the effectiveness of your training materials
- Students receive immediate feedback with test scores
- Your testing administrator receives an immediate E-mail confirmation with the test takers name, completion date and grade
- Your administrator will receive consolidated reports at pre-selected intervals
- Completely portable and scalable - nothing to install (simply requires internet access)
- Easily implemented across your entire organization worldwide
